RE: **Material Safety Data Sheets**

Dear Valued Customer:

Haynes International, Inc. is pleased to enclose the following Material Safety Data sheets (MSDS), which contain health and safety information. These take precedence and supersede any previous Material Safety Data Sheets you may have for our products, so please update your MSDS files accordingly.

The enclosed MSDSs are being supplied to you as part of our continuing efforts to comply with the OSHA Hazard Communication Standard (29 CFR 1910, 1200), Title III of the Superfund Amendment and Reauthorization Act of 1986 (SARA) Public Law 99-949, 40 CFR Part 372 Sections 311, 312, and 313. These MSDSs are also compliant with state regulated laws with respect to California's "Safe Drinking Water and Toxic Enforcement Act of 1986" (Proposition 65) and Pennsylvania Worker and Community Right to Know.

Material Safety Data Sheets (MSDS) provide information on a specific group of manufactured metal products. Since these metal products share a common physical nature and constituents, the data presented are applicable to all alloys identified.

These Material Safety Data Sheets supply information that is valuable to your employee's safety and health program. It is important that your facility personnel responsible for the hazard communications, industrial hygiene or safety receive this information and that it is communicated and made available to those employees who may have contact with these products.

Revised Material Safety Data Sheets shall be promptly forwarded to you when significant changes of information contained therein necessitate publication of an updated copy.

If you have any questions concerning the Material Safety Data Sheet, please contact the Haynes International, Inc. Representative for assistance or visit our web site at www.haynesintl.com.

Sincerely,

A handwritten signature in cursive script that reads "Stephen M. Fischer".

Stephen M. Fischer
