HAYNES INTERNATIONAL, INC. ANNOUNCES DEVELOPMENT OF HAYNES® HR-235™ ALLOY

KOKOMO, IN, March 8, 2013 – Haynes International, Inc. (NASDAQ GM: HAYN) a leading developer, manufacturer and marketer of technologically advanced high performance alloys, is pleased to announce the development of HAYNES® HR-235™ alloy. This alloy has excellent resistance to metal dusting in carbonaceous high temperature environments. Potential uses include applications in petrochemical production and syngas plants. Similar to other nickel-based corrosion resistant alloys, the alloy is readily fabricated and welded. HR-235 alloy is being manufactured in several product forms including sheet, plate, pipe, tube, wire, billet and bar. Material will be available for trial evaluation as manufacturing progresses. Please contact Dr. Paul Manning at (765) 456-6099 or pmanning@haynesintl.com for more information.

About Haynes International

Haynes International, Inc. is a leading developer, manufacturer and marketer of technologically advanced, nickel- and cobalt-based high-performance alloys, primarily for use in the aerospace, chemical processing and land-based gas turbine industries.
